

• CATALOGUE — VOL. 01

Table Lights

Six handcrafted forms for the tabletop — brass, blown glass and alabaster, each carrying its own lineage from the studio's Aranya, Bhumi and Jal collections.

● ABOUT SRS

Good design quietly becomes part of life.

Shailesh Rajput Studio is a design practice creating sculptural lighting and objects inspired by the intelligence of nature — rooted in observation, curiosity and intuitive making. Every piece is treated as a living presence, carrying atmosphere, memory and story, shaped by hand rather than dictated by trend.

The practice works toward one purpose: to create moments of pause, reflection and inner connection. Design here is discovery, not control — intuition before logic, essence before ornament.
